

# HVX 200 Workflow

Created by Andrew Scholotiuk

## Shoot on HVX200 to P2

### Recommended Recording Formats

DVCPRO HD 720p 24pN (Dramatic or Documentary)  
DVCPRO HD 720p 30pN (Sports or Commercial)

### Approximate Recording Times 16GB Card

DVCPRO HD 720p 24pN = 42 minutes  
DVCPRO HD 720p 24pN = 30 minutes

### Variable Frame Rate ie. Slow Motion

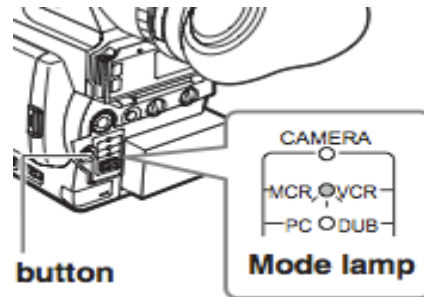

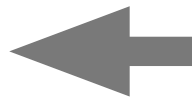

Go Into 1.Scene Setting/Operation Type = FILM

1. Scene Setting/Frame Rate <24 for slow motion  
>24 for fast motion

For default ie. no speed effects change frame rate  
to default

+

## Put HVX200 into 'PC Mode'

Push button at back to go into VCR Mode  
Now push and hold that same button  
The screen will go blue saying PC Mode  
Connect Camera by USB to Computer

## Copy entire files over to a unique folder

Do not share a folder with multiple P2 transfers  
Make sure you copy over the contents folder and txt file  
Do not open or mess with the contents folder  
This is now your digital master  
You can now eject your P2 Card

## Import into FCP

Create new project & Set Scratch Disks  
Go to File>Log and Transfer  
Click the + on the top left and select your unique folder  
Movie Clips should appear, name them and select  
add to cue
